

Epicture User Documentation

This document describes the fonctionnalités of the Epicture Android application.

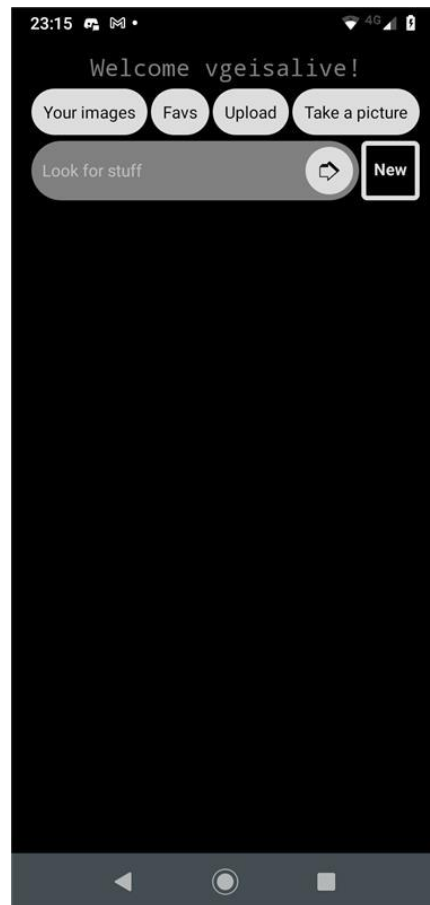

Authentication

Upon your first launch of the application, you might be required to make choices tied to the use of your personal data by Imgur. Feel free to parameter your options, then click 'Agree' or 'Disagree'.

To access the rest of the application, you need to have an account. If you don't have one, create one on the imgur website (<http://www.imgur.com>). When you have your credentials ready, enter them, then solve the captcha puzzle if you are required to solve one. Upon successful logon, you'll find yourself on the home page of the application.

Homepage

The home page provides the following fonctionnalities :

- 1) Display of your username
- 2) Access to the images you have uploaded
- 3) Access to your favorite images
- 4) Image upload
- 5) Image search on Imgur

Search

The search bar enables you to lookup other user uploads by typing a keyword in the input bar labeled « Look for stuff », then click the arrow. This will display a set of results, that you may upvote, downvote, or add to your favorites using the heart and arrows icons next to every result.

To access the comment linked to a picture, click it in the results.
